**Subject :** Introduction of JENEXT Job Cards to Students of your esteemed institution.

You may be aware of the fact that, on one side our country fights a huge unemployment problem with almost 30% of eligible population looking for Jobs and on the other side there are huge number of vacancies existing unaddressed across ~58 million establishments in India.

MilesAhead Tech Private Limited have analysed and understood the need for bridging the huge gap existing between Job Seekers and the opportunities existing across industries and across locations in the country and have launched , JENEXT, the first ever Multi Modal, Multilingual, Talent Reach Platform in the country which cross pollinates the Job Seekers especially the Blue collar workers and Fresh graduates to the Employers especially of the SME/MSME segment through a unique last mile approach.

JENEXT envisages to bridge the Gap through a direct interaction mechanism facilitating even the Non-Internet savvy and Non-English speaking populace to be highlighted to the suitable vacancies across spheres, thus helping the social cause of unemployment eradication.

Why JENEXT is useful to students

- Talent Reach Approach – Instead of students wasting their time for searching their Jobs, we make their profile visible instantly to all companies registered with us and companies can approach them directly.
- Visibility to companies – we Provide maximum exposure of every individual to the correct zones of his/her Job Interests as our ultra-dynamic filters will highlight and present to the Employers the available candidate profiles as per Job Descriptions set by them.
- All in One Platform- We connect to any kind of Jobs, Be it internship, Apprenticeship, Part time, Fulltime from lowest level to highest levels in any organisation be it a Fortune 500 company or a neighbourhood enterprise thus increasing the probability of suitable placements for the students instantaneously.
- 3 Step Verification process – We do candidate validation including Aadhar profiling so that companies look at Unique and authenticated Job seekers thus increasing the hit rate of placements.
