## **The Department of Education**

### **REPORT ON CIE**

The Continuous Internal Evaluation (CIE) of students is an initiative taken by the Department of Education each semester for the betterment of the students. Students in the Education Honours programme are continually assessed throughout the duration of their studies.

- ✓ An Induction Meeting is planned annually after the Admission Process has concluded. The Department of Education then provides the new students with an overview of the entire department, including information on course materials, curricula, teaching strategies, academic calendars, etc.
- ✓ Teachers administer tests at the end of each unit (per semester). In addition, the department organizes formative evaluations, such as written tests, viva voce, topic demonstrations, PowerPoint presentations, assignments, and project works, for all semesters except the first.
- ✓ Teachers in each paper typically administer three written exams to first-semester students. During the first week of the second month, we had our written exams (at the end of 30 days of class). The department then conducts a viva voce in the middle of the semester and collects assignments at the end of the semester.
- ✓ After the second month of classes, the department has arranged a viva voce test to evaluate students' basic understanding of course material and their daily active involvement in the classroom. Then we generally divided them into three groups based on their initial performance and behaviour:
  - Group 1: Slow Learners
  - Group 2: Average Learners
  - Group 3: Advanced Learners

**Tutorial Class:** We have tutorial classes for those who need extra help. For the Advanced Learners, we arrange Tutorial Classes. We hand out textbooks and other resources to support our advanced students in the tutorial class. In addition, we employed a wide range of effective instructional methods to ensure that our most advanced students were well served.

**Remedial Class:** We have arranged Remedial Classes for Average and Slow Learners. These types of classes reinforce the academic abilities of the students. Students in remedial classes benefit from the teaching and materials provided in their classes.
